PRODUCT DESCRIPTION

ETitanComb Heavy Duty Electric Comb Punch and Binding Machine ETitanComb Heavy Duty Electric Comb Binder is made of sturdy die casted metal rather than flexible sheet metal, this electric comb punch binder is the most heavy duty, reliable, user friendly, and functional machine in its class. The ETitanComb uses an encased lubrication system that drastically reduces friction and punch pin wear, which equates to longer machine life for the end user. By encasing the lubrication, you are guaranteed to never have lubrication spots on your punched pages. Utilizing the world's first full disengagement pin design recently copied by other manufacturers, punched paper is free from partial punches, on any size project. The disengagement pin design uses independent coil spring mechanisms on each pull pin that allows the pins to disengage with a crisp snapping action. With our specially designed Hi Torq punch motor, torture tested for 3,000,000 cycles, the ETitanComb takes comb binding to the next level of convenience and ease. The ETitanComb can punch 28 sheets of 20 lb paper with the gentle push on a foot pedal, eliminating the manual punching strain on staff members. After punching your paper, place the comb on the comb opener teeth and use the handle to open the comb, which easily open with the slightest of pressure. Features Specifications Heavy Duty Electric Punch up to 28 sheets 20 lb 25,000 per hour High Efficiency Punching Tool Lubrication System Extremely long punch tool life Full Disengagement Pins ensures a completely clean professional punch without partial punches on any length of paper Hands Free Punching Foot pedal controls punch actuation. Anti Jam Function Automatically senses and prevents jams. Binding up to 2 500 sheets, 11 standard punch width Lightweight Design Extensively utilized CAE Computer
