PRODUCT DESCRIPTION

TitanCoil Ultra Manual Punch and Electric Coil Binding Machine TitanCoil Ultra Manual Punch and Electric Coil Binding Machine is the most heavy duty, reliable, user friendly, and functional machine in its class. This Manual Punch and Electric Coil Binding Machine is made with a die casted metal for the base and sides of the housing unit rather than using sheet metal for the punching surface to ensure your machine is solid in all the important places. The TitanCoil Ultra uses an encased lubrication system that drastically reduces friction and punch pin wear, which equates to longer machine life for the end user. By encasing the lubrication, you are guaranteed to never have lubrication spots on your punched pages. The TitanCoil Ultra is capable of punching up to 28 sheets of 20lb paper in one punch. The DuraPunch super premium punching tool is made of the world's best materials. They are hardened and heat treated in a precision environment, then fitted with an oversize paper gate to offer DFG customers the finest machine for hardcover binding and take desktop coil binding to the next level. Internal high efficiency lubrication system is totally sealed and comparable to the punching dies of six figure equipment. Utilizing the world's first full disengagement pin design recently copied by other manufacturers, punched paper is free from partial punches, on any size project. The disengagement pin design uses independent coil spring mechanisms on each pull pin that allows the pins to disengage with a crisp snapping action. The 6 inch coil roller is all the rubber you need. Simply start the coil by hand and then touch it to the rubber roller. Your hands unconsciously will move the book as the coil is wound through the paper. 6 inch rollers are the professional standard. FEATURES SPECIFICATIONS Heavy Duty Manual Punch up to 28 sheets of paper 20 lbs DFG DuraPunch

PRODUCT SPECIFICATION

DIMENSIONS

Weight:	50.00 lbs.
Width:	15.00 inches
Length:	15.00 inches
Height:	10.00 inches
